COURSE DESCRIPTION
   Administrative law represents a substantial area of law practice in the United States. Legal matters covered under some administrative processes range from the suspension of children from public schools to the regulation of additives placed in the food supply. This course explores the foundations of administrative practice relevant to administrative processes at all levels of government. To accomplish this, the class will explore the federal administrative law—the primary model upon which most other administrative procedures are based. Though not a substantive area of law like environmental protection, securities, or tax, mastering administrative law is essential for achieving success in each of these and many other areas of law.

COURSE LEARNING OUTCOMES
   Upon completion of this course, students will be able to:

   • Explain to clients:
The role that administrative law plays in regulating all government related activities;
The time, place, and means they have to comment on proposed government rules;
The options they have to bring administrative challenges to governmental rulemaking and the mechanisms to do so.
The options they have to bring administrative challenges to administrative agency adjudications.
The rights they are entitled to in a governmental hearing or adjudication;
Represent clients in an administrative hearing on a subject within their legal expertise.
Advise clients on the standing requirements to file a judicial challenge to agency actions.
Counsel clients on the relative advantages and availability of administrative challenges to governmental actions over civil judicial suits.

PART 5: STUDENT RESPONSIBILITIES

MANAGING YOUR STUDIES
The following attributes will greatly contribute to your success in this course.

- Be self-motivated. You should be able to manage and direct your own learning environment and methods to fulfill course requirements and achieve individual academic success.
• **Be an independent learner.** Successful online students are self-starters. They work well with the flexibility that the 24/7 any time--any place format provides. You should be able to learn on your own and at an accelerated pace without direct supervision.

• **Have a minimum level of computer literacy.** Although it is not essential to have advanced computer skills, you should possess a working knowledge of email, the Internet, as well as basic keyboarding skills.

• **Manage your time well.** You must be able to organize and plan your own best "time to learn." There is no one best time for everyone, but the key to success is to make the time to learn.

• **Acquire effective communication skills.** You must use email and discussions to communicate with your peers and me. The ability to read and to write clearly to communicate ideas and assignments is essential. Also, sharing reflections - of your own work as well as your coursemates' - is a crucial component of a successful experience. This method provides you with rapid feedback as well to inform me of any concerns or problems that you may be experiencing.

• **Be personally committed to successfully completing this online course.** Because of the flexibility in scheduling in this course, you must have a strong desire to learn and acquire knowledge and skills via online courses. Making a commitment to learn in this manner is a very personal decision and requires a strong desire to perform to achieve academic success.

• Use appropriate mixed case text; avoid using all lowercase or all uppercase text (SHOUTING).
